6				
7				
8				
9				
10				

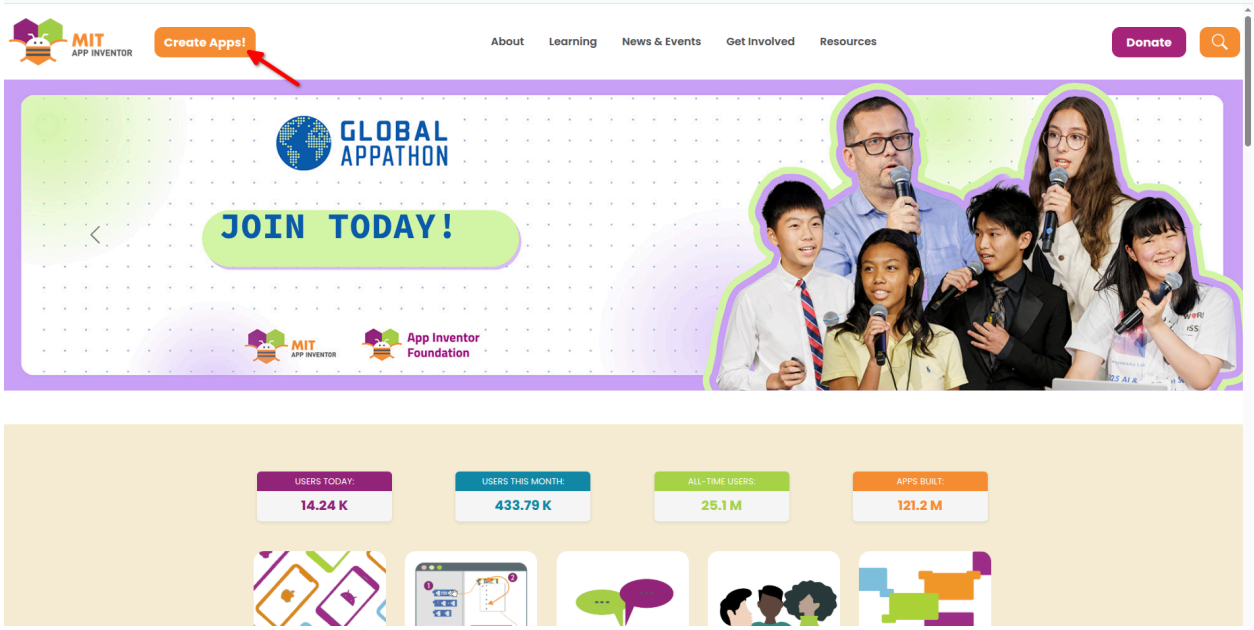
**make sure subject code in Teachers sheet and Students sheet are same no typo

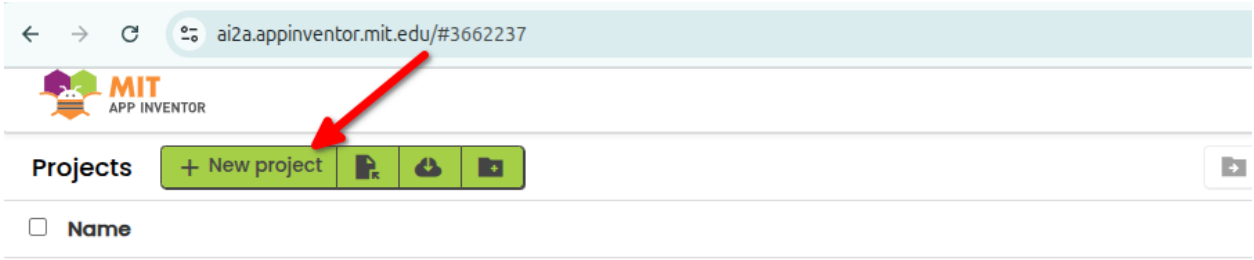
---

creating an app for attendence app.

1.Go to appinventor.mit.edu on your computer and click **Create Apps!** (Log in with your Google account).



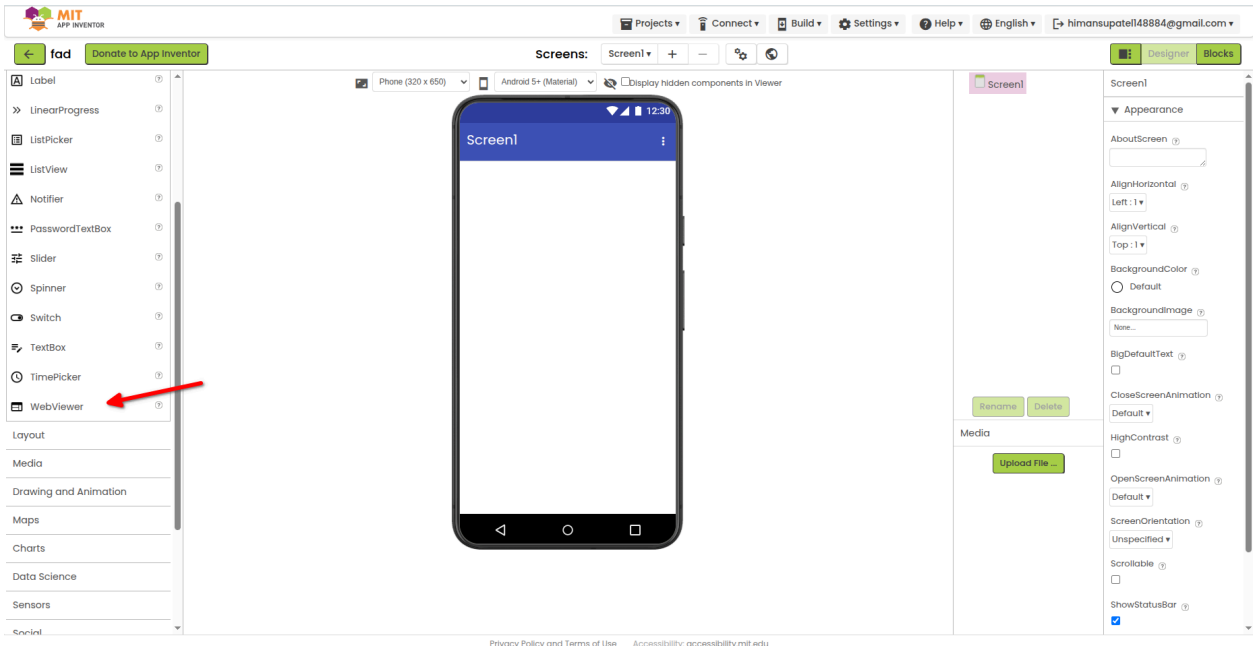
2.Click **Start new project** and name it something like "AttendanceApp".



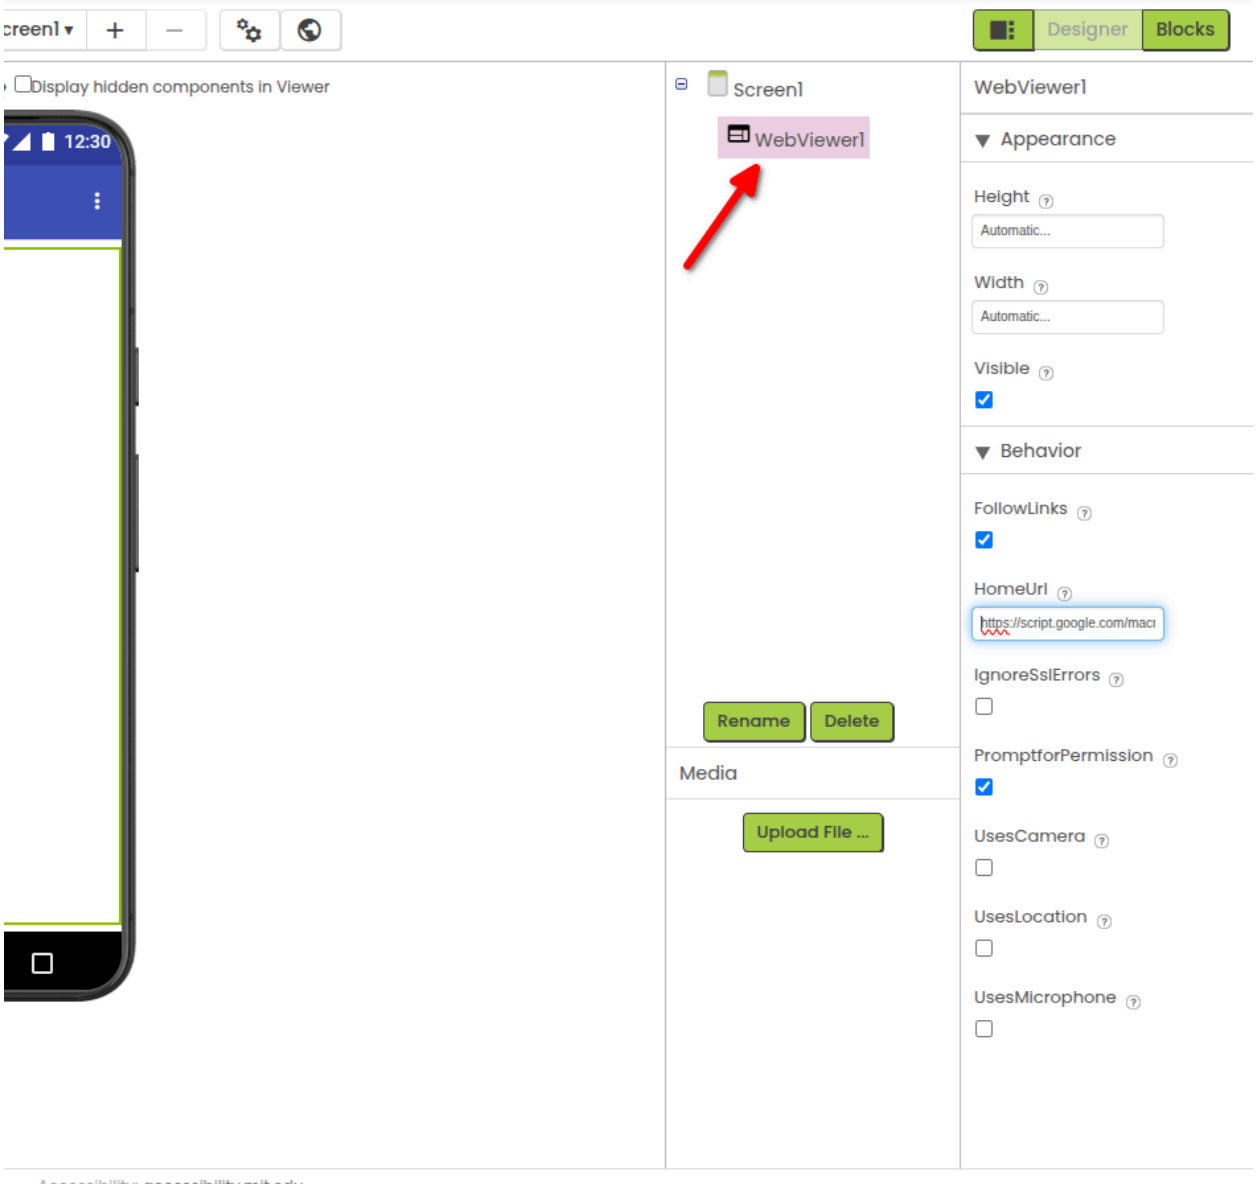
3.You will see a picture of a blank phone screen. Look at the menu on the left side under **User Interface**

.

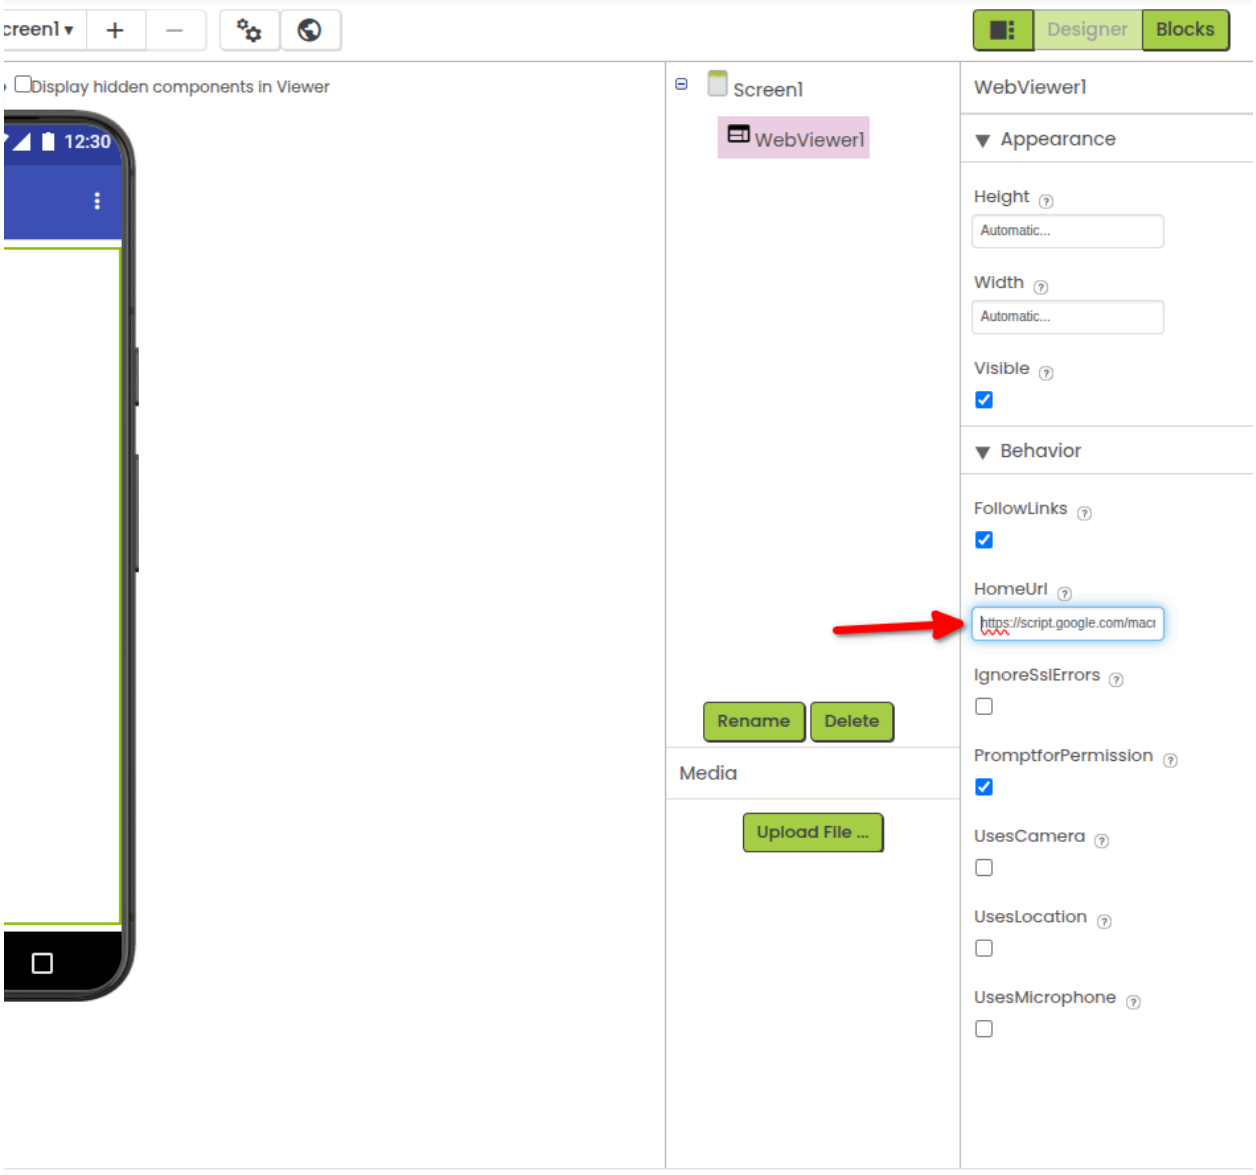
4. Scroll down, find **WebViewer**, and drag it onto the phone screen.



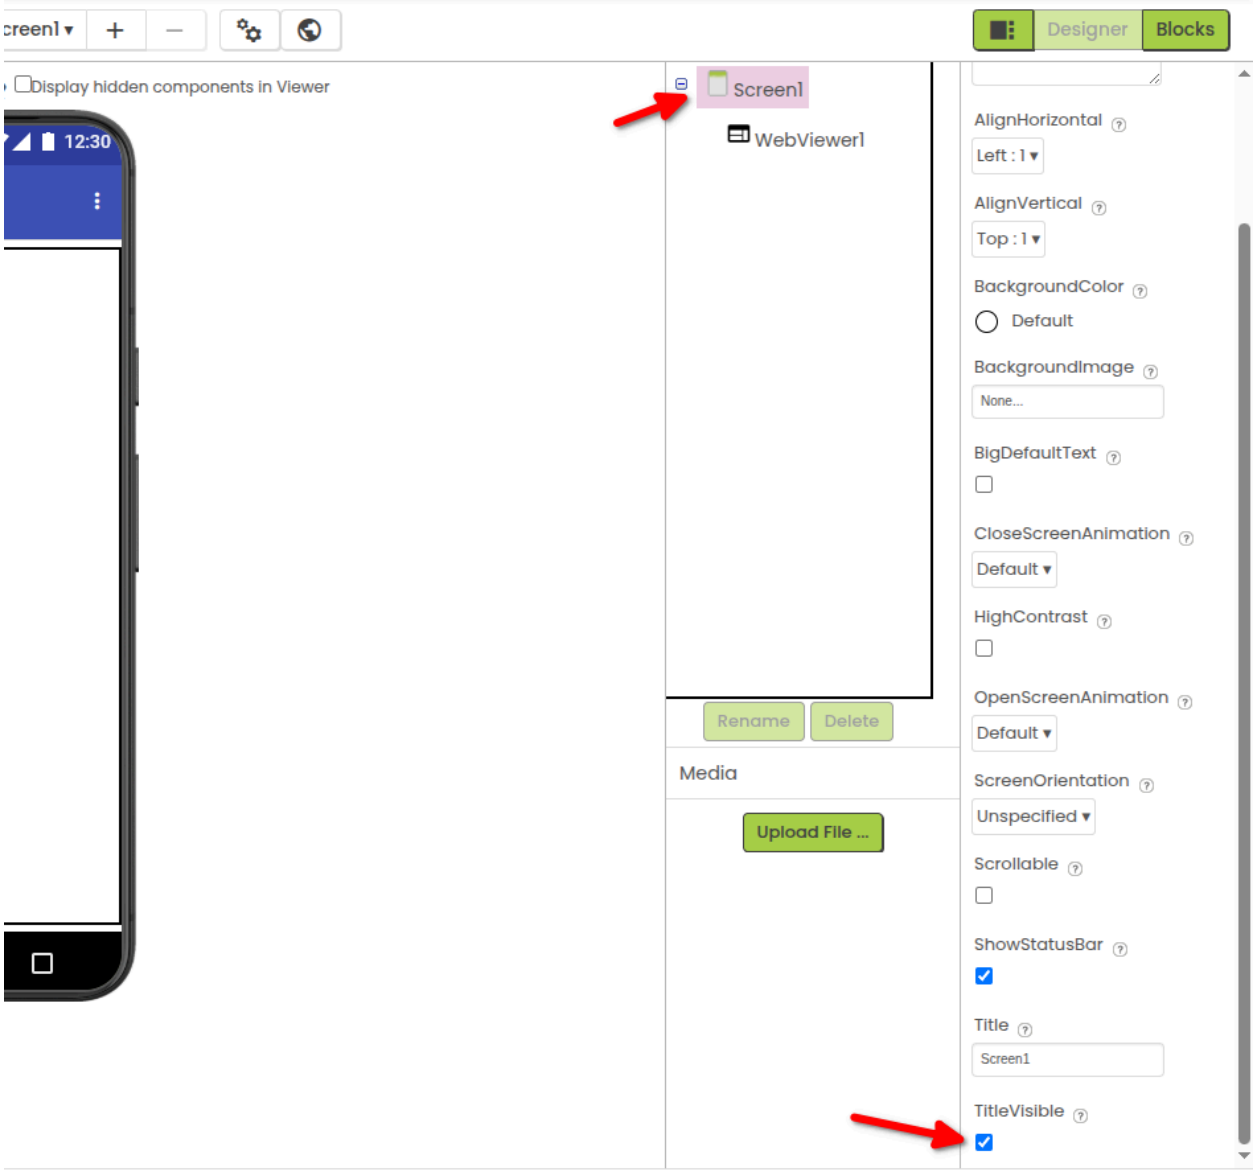
5.Look at the **Properties** menu on the far right side of the screen.



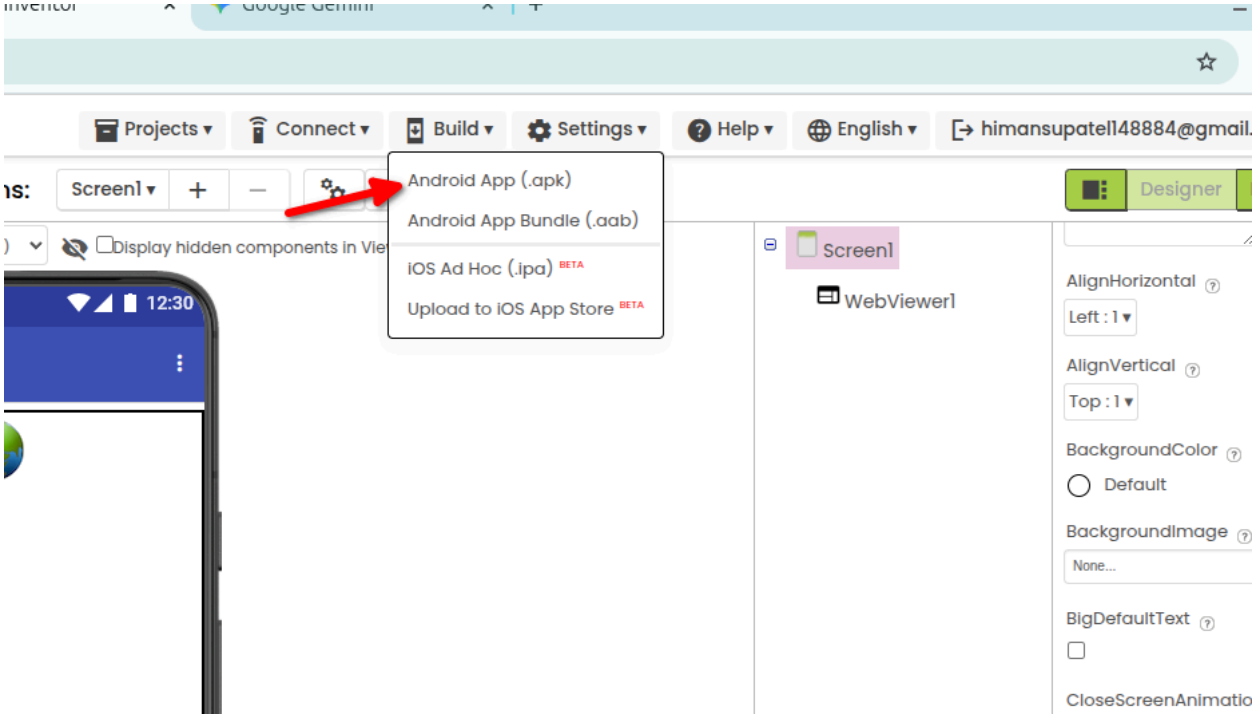
6.Find the box that says **HomeUrl** and paste your Apps Script Web App URL into it.



7.*(Optional)* To make it look like a real app, uncheck the box that says "TitleVisible" so the top grey bar disappears and your web app takes up the whole screen.



8. Click on Build -> select Android app(.apk)



9. install it its ready to use
